

## **COVER LETTER**

Whenever somebody tells you that you could write a letter to unknown employer – don't trust him! And whatever, I will try...

There is a saying that this is my "bingo" shoot... which will add more color to my CV!

You may ask how come?

Who knows... May be because I know that I don't know many things and that's why I'm learning things all the time.

May be because I'm always extremely loyal with the people who are same with me.

May be because I know when, what and how to say it.

May be because I'm always devoted to my job and trying to do it in the perfect way as long as know that my family is secure and save.

May be because I always stand behind and support my subordinates even when I'm the loser.

May be because everybody respects me at work - my subordinates, my colleagues and my commanders, and I know that this is something I have to start to build up again on the new position.

I couldn't say that I don't care where and for whom I will work. The company must be perspective and to offer me good career opportunities.

I think highly of the mutual trust. I always answer to the trusted freedom with loyalty.

I don't talk much, but I'm always ready to listen with open ears. I don't take decisions, before to analyze all the facts and different opinions from the specialists in the area. At the moment I'm the one who order at work, but I can also be very good in being the one to carry out the orders.

I'm not afraid from taking decisions. I'm not afraid from taking non conventional decisions. At my present position the most of them are from the second kind.

I do explore the weak spots in the project and the right way to solve the problems. And I had managed most of the times.

Quite few times there was a necessity to manipulate the people, so I can complete my targets, but never caused loss to them.

I'm well introduced to the IT and communication's technologies. I learn all with pleasure if I don't know enough. In my opinion there is nothing in that man can not become proficient. Not always I have possibility to extent myself knowledge in details in distinct fields but I conduct successfully experts of selfsame fields.

I do speak and write in Bulgarian and I'm proud to be Bulgarian. But that never mention me to get on well with people other nations and ethnic. I know that I have to speak English perfect and I learn every time when I have possibility to do this. I use Russian at work level, too.

I do respect every one for what is he without minding his sex, race or religion.

My family is very important for me and that's why I do mind the finance valuation of my work devotion.

I love to do everything with a smile, without needless stress and without unnecessary bothering the others. My sense of humor always helps me even with the most important tasks.

I got a clean driving license for "C" category.

Why I'm looking for another job when my present position pleases me, I love it and I'm well paid... or leastwise was?

Because of my loyalty I will never say something bad about the Armed Forces. I'm looking for another perspective job because there are no longer future perspectives for my position there, at least no longer than few months.

I have already necessary length of service and requested documents to leave Armed Forces like pensioner.

I expect following mine problems about my candidature:

- I live in Ovcha Kupel Estate in Sofia and I have no my own car now (it could be a little problem in depend of office place);
- There is possibility of difficulties about my leaving of Bulgarian Armed Forces because I am necessary with my training there; But there is no juridical obstacles somebody to stop me;
- I will need of transitional period to leave Armed Forces and to work full value on the new place.

Advantages for you could be:

- My loyalty, my organization, my discipline;

- My experience in field of project management of communication and information systems in the Army, although in different normative and legal environment;
- My willingness for perfect myself;
- My contacts with companies in the field of communication and information technologies;
- My contacts with Bulgarian Armed Forces and people, who are responsible for development of communication and information systems of the army;
- May be there is other, too. But my good breeding doesn't allow me to be immodest.

The rest you will find in my CV or you are more than welcome to contact me.

Best regards,

A handwritten signature in black ink, consisting of a long horizontal line followed by a stylized, cursive signature.

Anton Ivanov
